INTERNATIONAL CONFERENCE

The 2nd Bioprotection for Sustainable Agriculture (ICBPSA 2025)

Theme “*Application of Bioprotection in Climate-Resilient Agriculture*”

(28-30th August, 2025, Hue City, Vietnam)

SECOND ANNOUNCEMENT

Introduction

Agroecological Crop Protection is the application of agroecological principles to crop protection. It builds upon two core principles of agroecology - enhancing biodiversity and strengthening soil health - alongside the foundational principle of crop protection, which emphasizes preventive measures against pests.

ICBPSA 2025 will focus on bioprotection as a key component of sustainable agriculture. The conference aims to be a premier platform for scientists and stakeholders committed to advancing crop protection. It will facilitate the global exchange of knowledge, research findings, and practical experiences in bioprotection.

The event will be hosted by University of Agriculture and Forestry, Hue University (HUAF) in collaboration with French Agricultural Research Centre for International Development (CIRAD), The College of Agriculture, Can Tho University (CoA, CTU), Nong Lam University, Ho Chi Minh City (NLU), Faculty of Forestry Agriculture, Tay Nguyen University (FFA, TNU), Vietnam National University of Agriculture (VNUA) and Plant Protection Research Institute (PPRI) with the theme “**Application of Bioprotection in Climate-Resilient Agriculture**”. Focusing on following contents:

- *Environment Friendly Plant Protection Solutions;*
- *Biotechnology in Plant Protection;*
- *Soil health;*
- *Plant Breeding Adapted with Pest Revolution and Climate-Change;*
- *Advanced Techniques in Pests Detection, Inspection and Management;*
- *Integrated Plant Health Management;*
- *Agricultural Bio-products.*
